

I'm not robot!

Process up to 40% more conical tubes in the swing-out rotor and 100% more in fixed angle configuration with Thermo Scientific™ Sorvall™ Legend™ XT/XF Centrifuge Series. This series delivers high-performance processing on the benchtop or floor with unparalleled processing performance, maximum versatility, and exceptional energy efficiency. Simple OperationIntuitive control panel and digital displayDetailed operation information, including the display of set and actual parameters, maximizes run performance and temperature accuracy for improved sample protectionEasily adjust speed, time, and temperature, even during the run, with the convenient keyboard for direct inputInnovative lid-locking technology enables one finger downward motion for easy closing and locking of centrifuge lid, even on tall benchesDouble temperature management system displays the air temperature in the chamber as well as the sample temperature, ensuring accurate control of the sample temperature during the runAuto-Lock™ III Rotor SystemThe secure locking system allows easy push-button installation and exchange of rotorsSaves time in the switch between applicationsEasy access to the chamber enables quick cleaning, a healthier working environment, and longer unit lifeClickSeal™ Bucket Sealing SystemBiocontainment system seals with a snap; eliminates screw caps and complicated clipsGlove-friendly, one-handed open/close capabilityCertified by CAMR™ in Porton Down, UKSMARTSpin™ TechnologyAdvanced rotor management system maximizes acceleration, braking, and residual load imbalance for each rotor and bucket optionOptimizes safety and improves separationsSpace-Saving DesignCompact size conserves workspace on benchtop or floorErgonomic height and curved design ensure comfortable sample handling and cleaning of the unitEnergy EfficientThe design saves up to 40% of energy on industry-standard protocols such as blood separations or conical-tube processingVentilated Model Legend XTDimensions: 26.4L × 22.2W × 14.2 in.H [35.4 in.H open] (67 × 56.5 × 36cm [90cm open])Net weight: 189.6 lb. (86kg)Refrigerated Model Legend XTRFor high-performance applications with temperature-sensitive samplesCFC-free refrigeration systemTemperature Range: -10° to +40°CPre-Cooling Function with a direct button26.4L × 29.3W × 14.2 in.H [35.4 in.H open] (67 × 74.5 × 36cm [90cm open])Net weight: 255.7 lb. (116kg)Ventilated Model Legend XFDimensions: 26.4L × 22.2W × 31.1 in.H [54.5 in.H open] (67 × 56.5 × 79cm [138.5cm open])Net weight: 336.2 lb. (152.5kg)Refrigerated Model Legend XFRFor high-performance applications with temperature-sensitive samplesCFC-free refrigeration systemTemperature Range: -10° to +40°CPre-Cooling Function with direct button26.4L × 29.3W × 31.1 in.H [57.4 in.H open] (67 × 74.5 × 79cm [139cm open])Net weight: 314.2 lb. (142.5kg)Ordering Information:For exceptional versatility, the Sorvall XT series supports a wide range of rotors and adapters, including Thermo Scientific Fiberlite™ rotors, for a minimum of 16 rotor configurations. All rotors and adapters are sold separately.Recommended for:Cell culture, microplate, bioproduction, food safety, blood separation, bodily fluids processing, pharmaceutical, biotechnology, stem cell, microbiology, molecular biology, proteomics, genomicsDetails for Sorvall™ Legend™ XT/XF Centrifuge Click HereProcess up to 40% more conical tubes in the swing-out rotor and 100% more in fixed angle configuration with Thermo Scientific™ Sorvall™ Legend™ XT/XF Centrifuge Series.
